Notes to the Financial Statements

(Unaudited) (in thousands of dollars)

Note 1. Nature of Operations

The Canadian Scholarship Trust Plan II (“Plan II” or the “Plan”) is a Pooled Education Savings Plan, established on December 1, 1979. The objective of Plan II is to assist parents and others to save for the post-secondary education of children.

Deposits are made by a contributor to an account maintained by the depository trustee on behalf of a beneficiary. The contributor authorizes deductions of enrolment fees from deposits and depository charges from their principal deposit balance. The principal accumulated over the term of the education savings plan agreement is returned to the contributor when the plan matures and the beneficiary is a qualified student, or upon termination. The investment income earned on such principal deposits until maturity is used to provide education assistance payments to qualified students. A beneficiary is deemed to be a qualified student upon receipt by the Canadian Scholarship Trust Foundation (the “Foundation”) of evidence of enrolment in a qualifying educational program at an eligible institution.

Effective January 1, 2005, the Federal Government enhanced the Canada Education Savings Grant Program (“CESG”) whereby Registered Education Savings Plans (“RESPs”) receive grant amounts dependent on family income.

On February 21, 2007, the Québec government introduced the Québec Education Savings Incentive (“QESI”) for beneficiaries who are under eighteen years of age and reside in Québec on December 31 of each year. The amount of QESI to be received by a beneficiary will depend on annual family income.

Plan II receives the CESG and QESI (collectively, “Government Grants”) which are paid directly into a beneficiary’s RESP and invests these funds in accordance with the Plan’s investment policies. The Government Grants along with investment income earned thereon are paid to qualified students.

Contributor education savings plan contracts (“agreements”) are registered, if all required information is provided, with appropriate government authorities and, once registered, are subject to the rules for RESPs under the *Income Tax Act* (Canada). The current tax legislation provides that income credited on contributors’ deposits is not taxable income of the contributor. The deposits are not deductible for income tax purposes and are not taxable when returned to the contributor. Payments made to a qualified student will constitute taxable income of that student in the year that the payments are made.

Plan II is administered through the Foundation and its wholly-owned subsidiary, C.S.T. Consultants Inc. (“C.S.T.C.”). The Foundation was created to encourage and promote post-secondary education by making education savings plans available to Canadian families.

Note 2. Significant Accounting Policies

(a) Generally accepted accounting principles

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles (“Canadian GAAP”).

(b) Adoption of accounting standards

i. Amendments to Canadian Institute of Chartered Accountants (“CICA”) Handbook Section 3862

In June 2009, the Canadian Accounting Standards Board (“AcSB”) approved amendments to CICA Handbook Section 3862 “Financial Instruments – Disclosures”. The amendments require publicly accountable enterprises to classify fair value measurements based on a three-level fair value hierarchy. “Level 1” financial instruments are valued using quoted prices (unadjusted) in active markets for identical assets or liabilities. “Level 2” financial instruments are valued using observable inputs other than quoted prices included in Level 1. “Level 3” financial instruments are valued using unobservable inputs for the asset or liability. The breakdown of the Plan’s Total Investment Fund into the three-level hierarchy is provided in Note 8. Adoption of the amendments did not impact the financial results of the Plan.

ii. EIC-173

In January 2009, the CICA’s Emerging Issues Committee issued Abstract No. 173, Credit Risk and the Fair Value of Financial Assets and Financial Liabilities (“EIC-173”). EIC-173 requires that an entity’s own credit risk and the risk of the counterparty should be taken into account in determining the fair value of financial assets and financial liabilities, including derivative instruments. Management has reviewed its policies concerning valuation of assets and liabilities and believes that the fair values ascribed to the financial assets and financial liabilities in the Plan’s financial statements incorporate appropriate levels of credit risk.

(c) Future accounting standards

In February 2008, the Canadian AcSB confirmed that the use of International Financial Reporting Standards (“IFRS”) will be required for publicly accountable enterprises. IFRS will replace Canadian GAAP and becomes effective for the Plan’s interim and annual financial statements relating to fiscal year ending October 31, 2012. Management is in the process of developing a transition plan, which will include identifying differences between the Plan’s current accounting policies and those it expects to apply under IFRS, as well as any accounting policy and implementation decisions and their resulting impact, if any, on the financial statements of the Plan.

(d) Investment valuation

All bonds are carried at fair value, using bid prices at period end. Fair value represents the amount at which a security could be exchanged in an arms’ length transaction and is best evidenced by

Notes to the Financial Statements (continued)

(Unaudited) (in thousands of dollars)

Note 2. Significant Accounting Policies (continued)

(d) Investment valuation (continued)

a quoted bid price, if one exists. If quoted market prices are not available, the fair values presented are estimates derived using present value or other valuation techniques. Such techniques include assumptions related to the assessment and quantification of market, credit, liquidity and currency risks referred to in Note 5.

Variable rate securities are hybrid financial debt instruments issued by governments, Canadian chartered banks and licensed trust and loan companies that have embedded components that change the risk/return profile of the security. Included in this class are structured notes that are debt instruments whose returns are based on indices or underlying assets rather than typical interest payments. Variable rate securities are carried at fair values using external pricing models to value their components.

Short-term notes are carried at fair value.

(e) Investment transactions and income recognition

Investment transactions are accounted for on a trade date basis. Interest income on investments is recognized using the effective interest method. Realized gains (losses) on the sale of investments and change in unrealized gains (losses) on investments are calculated with reference to the average cost of the related investments and are recognized in the period that such gains (losses) occur.

(f) Contributors' deposits, and Depository charges

Contributors' deposits reflect amounts received from contributors net of enrolment fees and depository charges and do not include future amounts receivable on outstanding agreements. Depository charges are paid annually to the Foundation by contributors of Plan II from their contributors' deposits. These charges are accrued throughout the period.

(g) Income taxes

Plan II is exempt from income taxes under Section 146.1 of the *Income Tax Act* (Canada).

(h) Cash and cash equivalents

Cash and cash equivalents include cash and short-term investments with a purchase date to maturity of 90 days or less.

(i) Use of estimates

In preparing the financial statements, management is required to use estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from the current estimates. Significant estimates included in these financial statements relate to valuation of certain investments.

Note 3. Related Party Transactions

Administration of Plan II

The Foundation has appointed its wholly-owned subsidiary, C.S.T.C., to distribute and administer Plan II. Depository charges and administration fees (comprising Plan administration and processing fees and Financial reporting expenses) are paid to the Foundation. Administration fees are annual fees of ½ of 1% of the total amount of principal, Government Grants and income earned thereon and are paid monthly.

Note 4. Investment Holdings

The investment holdings are disclosed in Schedule I – Statement of Investment Portfolio and the related Appendices I and II to the schedule which are explained below.

The Government Grants received from Human Resources and Skills Development Canada are collectively invested together with other C.S.T.C. administered plans. The principal and income received are separately tracked for each contributor's agreement. The portfolio holdings are allocated across all plans based on the proportion of principal and income attributable to agreements within each plan. The Government Grant allocation across the plans is provided in Appendix I to Schedule I.

Upon maturity of each agreement, the investment income accumulated to date attributable to that agreement is transferred to the Canadian Scholarship Trust Scholarship Pool (the "Pool"), a shared investment pool with Founders' Plan, another plan administered by C.S.T.C. (see Appendix II to Schedule I). From a contributor's perspective, the income that is transferred is tracked by plan and by year of eligibility.

The portfolio holdings of the Pool are allocated based on the Plan's proportionate share of income remaining in the Pool. Income earned from the Pool is credited to the General Fund (Note 7).

Note 5. Risks Associated with Financial Instruments

In the normal course of business the Plan may be exposed to a variety of risks arising from financial instruments. The Plan's exposures to such risks are concentrated in its investment holdings and are related to market risk (which includes interest rate risk and other price risk), credit risk, liquidity risk and currency risk.

The Plan's risk management process includes monitoring compliance with the Plan's investment policy. The Plan manages the effects of these financial risks to the Plan portfolio performance by retaining and overseeing professional external investment managers. The investment managers regularly monitor the Plan's positions, market events and manage the investment portfolio within the constraints of the investment policy.

Notes to the Financial Statements (continued)

(Unaudited) (in thousands of dollars)

Note 5. Risks Associated with Financial Instruments (continued)

(a) Market risk

i. Interest rate risk

Interest rate risk is the risk of a decrease in the Plan's yield on interest-bearing investments as a result of fluctuations in market interest rates. There is an inverse relationship between changes in interest rates and changes in the fair value of bonds. This risk is actively managed using duration, yield curve analysis, sector and credit selection. There is reduced risk to interest rate changes for cash and cash equivalents due to their short-term nature.

The Plan's holding of debt instruments by maturity are as follows:

Debt Instruments by Maturity Date	% of Total Investment Fund	
	Apr 30, 2010	Oct 31, 2009
Less than 1 year (including short-term investments)	78%	78%
1-3 years	12%	12%
3-5 years	5%	4%
Greater than 5 years	5%	6%
Total debt instruments	100%	100%

As at April 30, 2010, if prevailing interest rates had increased or decreased by 1%, the Total Investment Fund amount of \$20,885 (October 31, 2009 – \$22,830) as per Schedule I – Statement of Investment Portfolio, would have decreased or increased by approximately \$164 (October 31, 2009 – \$181). This 1% change assumes a parallel shift in the yield curve with all other variables held constant. In practice, the actual trading results may differ materially.

ii. Other price risk

Other price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, other than those arising from interest rate risk. Factors specific to an individual investment, its issuer or all factors affecting all instruments traded in a market or market segment affect other price risk. The asset class that is most impacted by other price risk is variable rate securities which represents 0.4% of the Total Investment Fund amount as at April 30, 2010 (October 31, 2009 – 0.45%). The risk is managed by security selection and active management by external managers within approved investment policies and manager mandates. If underlying prices had increased or decreased by 1% there would have been no impact on the Total Investment Fund amount as per the Statement of Investment Portfolio as at April 30, 2010 and October 31, 2009.

(b) Credit risk

Credit risk refers to the ability of the issuer of debt securities to make interest payments and repay principal. The Plan's portfolio comprises bonds issued or guaranteed by federal or provincial governments along with corporate debt instruments with a minimum approved credit rating as set by the Canadian Securities Administrators, currently A-low. Plan II has a concentration of investments in government and government guaranteed bonds, which are considered to be high credit quality investments thereby moderating credit risk.

The Plan's credit risk exposure is listed below:

Credit rating	Apr 30, 2010		Oct 31, 2009	
	% of Total Investment Fund	Amount (in thousands)	% of Total Investment Fund	Amount (in thousands)
AAA/AAH/AAL	20%	\$ 4,146	19%	\$ 4,377
AA/AH/AL	5%	964	4%	1,015
A	0%	34	0%	49
BBB	0%	1	0%	–
R-1	72%	15,006	75%	17,022
Short-term unrated	3%	734	2%	367
Total Investment Fund	100%	\$ 20,885	100%	\$ 22,830

The Dominion Bond Rating Service was the primary source for obtaining credit ratings. Secondary sources used include Standard & Poor's and Moody's.

(c) Liquidity risk

Liquidity risk is the risk that the Plan may not be able to meet its obligations on time. The Plan's exposure to liquidity risk is concentrated in principal repayments to subscribers and payments of Education Assistance Payments. The Plan primarily invests in securities that are traded in the active markets and can be readily disposed. The Plan retains sufficient cash and cash equivalents positions to meet liquidity requirements by utilizing cash forecasting models incorporating aging of Accumulated interest and Contributors' deposits. All other financial liabilities are short term and due within one year.

(d) Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Plan is not exposed to currency risk as it only holds Canadian securities.

Notes to the Financial Statements (continued)

(Unaudited) (in thousands of dollars)

Note 6. Contributors' Deposits

The changes in Contributor's deposits for the six months ended April 30, 2010 and 2009 are as follows:

	Apr 30, 2010	Apr 30, 2009
Inter-Plan principal transfers	\$ (75)	\$ (55)
Depository charges	(1)	(2)
Return of principal	(514)	(900)
Net decrease in Contributors' deposits	(590)	(957)
Balance, Beginning of Period	1,655	2,995
Balance, End of Period	\$ 1,065	\$ 2,038

Note 7. General Fund and Donations from the Foundation

The Canadian Scholarship Trust (the "Canadian Trust") is a legal trust registered with Canada Revenue Agency as an Education Savings Plan. Included in the Canadian Trust are Plan I, Plan II and Founders' Plan (the "Plans"). According to the trust indenture, the General Fund may be used to subsidize Education Assistance Payments for qualified students to any of the Plans within the Canadian Trust. The General Fund derives its income from the following sources:

- i) interest earned on Contributors' deposits and Accumulated interest from the date of maturity to the date the funds are paid to qualified students as Education Assistance Payments;
- ii) interest earned on the interest forfeited when a Contributor's plan is terminated prior to maturity;
- iii) income not collected by beneficiaries before the expiry of the benefit period;
- iv) unclaimed principal and income payments; and
- v) interest earned on the Government Grants applicable to terminated plans. Effective July 1, 2005, government regulations do not allow for the allocation of this interest to the General Fund. Any interest earned thereon is payable to a designated educational institution.

Donations from the Foundation represent a discretionary pool of funds shared between Plan II and Founders' Plan. These funds are used to supplement Education Assistance Payments when the General Fund is depleted. The amount is annually allocated between the above plans according to the payout forecast in each plan.

In accordance with the policy on Transferring General Fund and Donations Between Plans within the same legal trust and based on the forecast liability for Plan II, there will be approximately \$5 million available for transfer to Founders' Plan over a four year period. The forecast will be updated and reviewed annually.

Note 8. Fair Value of Financial Instruments

Fair value represents the amount at which a financial instrument could be exchanged in an arm's length transaction between willing parties under no compulsion to act and is best evidenced by a quoted market price, if one exists.

Investments and Cash equivalents are carried at fair value as set out in Note 2. The carrying values of other financial instruments such as Accrued interest and other receivables, Receivables for securities sold, Accounts payable, accrued liabilities and unclaimed contributors' funds, Payables for securities purchased, Government grants payable and Contributors' deposits approximate their fair values as these financial instruments are short term in nature.

The following table presents the Plan's financial instruments measured at fair value classified by the fair value hierarchy set out in CICA Section 3862 as described in Note 2(b).

Assets Measured at Fair Value as of April 30, 2010

	Level 1	Level 2	Level 3	Total
Cash and Cash Equivalents	\$ 5,525	\$ -	\$ -	\$ 5,525
Short-term Investments	-	10,211	-	10,211
Fixed Income Securities	-	5,066	-	5,066
Variable Rate Securities	-	-	83	83
Total Investment Fund	\$ 5,525	\$ 15,277	\$ 83	\$ 20,885

Assets Measured at Fair Value as of October 31, 2009

	Level 1	Level 2	Level 3	Total
Cash and Cash Equivalents	\$ 3,843	\$ -	\$ -	\$ 3,843
Short-term Investments	-	13,539	-	13,539
Fixed Income Securities	-	5,354	-	5,354
Variable Rate Securities	-	-	94	94
Total Investment Fund	\$ 3,843	\$ 18,893	\$ 94	\$ 22,830

The Plan's financial instruments classified as Level 3 represent the Plan's investment in Equity Linked Notes, which are principal protected by a major Canadian Bank (DBRS rating "AA"). Equity linked notes are hybrid securities comprised of a bond and an option. The price of the variable rate securities is derived from the information on similar publicly traded bonds and options using standard pricing methodology. No alternative pricing methodology is deemed possible.

Level 3 – Variable Rate Securities

	Apr 30, 2010	Oct 31, 2009
Opening Balance	\$ 94	\$ 25,485
Net Sales	(11)	(21,131)
Decrease in Unrealized Gains/Losses	-	(4,260)
Closing Balance	\$ 83	\$ 94
